

Core Drilling - UAE, Oman, Qatar

07/09/2016 19:34 by admin

For a perfect work one requires a perfect worker. Young and enthusiastic entrepreneur Ronald Mascarenhas of Mangalore is the right man with an incomparable art of Concrete Hole Drilling.

Core drilling and Concret Cutting Co. is engaged in concrete drilling for the purpose of providing sleeves, pipe holes, ducts concret openings in rcc for doors and windows and ac openings as well as drilling on multy storey towers to provide anchors to fast fascia angles to receive cladding. Machines used for this purpose are laser weldedÂ diamond chip barrels for vibration less smooth cuttingÂ and without noise, and without any shock and damage to the RCC structure and cutting will be done through the Reinforced steel.

The company is specialized in concrete drilling and can drill upto 40 cms dia x 1.8 Mtr deep in single operation.Â They can also cut concrete walls upto 1mtr deep and floors 50cm deep using hydrowulic powerpacks "adamas power pack and deudium cutting head using 1.2mtr dia diamond blade"

For your requirements on any projects related to coredrilling, concrete cutting and general maintenance the trusted name is Core drilling and Concret cutting. co., further core bits, barrels and core cutting machines are also available for trading.
