

This Brave Doctor Who Helped US Nab Osama Bin Laden Has Been Languishing In Jail Since 2011

23/01/2018 04:10 by admin

Shakil Afridi has languished in jail for years " since 2011, when the Pakistani doctor used a vaccination scam in an attempt to identify Osama bin Laden's home, aiding US Navy SEALs who tracked and killed the al-Qaida leader.

Americans might wonder how Pakistan could imprison a man who helped track down the mastermind of the 9/11 attacks. Pakistanis are apt to ask a different question: how could the United States betray its trust and cheapen its sovereignty with a secret nighttime raid that shamed the military and its intelligence agencies?

"The Shakil Afridi saga is the perfect metaphor for US-Pakistan relations" " a growing tangle of mistrust and miscommunication that threatens to jeopardize key efforts against terrorism, said Michael Kugelman, Asia program deputy director at the Woodrow Wilson Center in Washington.

Twitter

Afridi used a fake hepatitis vaccination program to try to get DNA samples from bin Laden's family as a means of pinpointing his location. But he has not been charged in connection with the bin Laden operation.

He was accused under tribal law alleging he aided and facilitated militants in the nearby Khyber tribal region, said Nadeem. Even the Taliban scoffed at the charge that was filed to make use of Pakistan's antiquated tribal system, which allows closed courts, does not require the defendant to be present in court, and limits the number of appeals, he said.

If charged with treason " which Pakistani authorities say he committed " Afridi would have the right to public hearings and numerous appeals all the way to the Supreme Court, where the details of the bin Laden raid could be laid bare, something neither the civilian nor military establishments want, his lawyer said.

Tensions have grown between Pakistan and the US since Trump's New Year's Day tweet in which he accused Pakistan of taking \$33 billion in aid and giving only "deceit and lies" in return while harboring Afghan insurgents who attack American soldiers in neighboring Afghanistan. Days later, the US suspended military aid to Pakistan, which could amount to \$2 billion.

Reuters

Infuriated by Trump's tweet, Pakistan accused Washington of making it a scapegoat for its failure to bring peace to Afghanistan.

The Wilson Center's Kugelman advocated a "scaled-down relationship" between the two countries. He said both sides need to agree to disagree on some issues and instead focus on those areas where they can agree to cooperate against terror groups that both regard as threats, including the Islamic State group and al-Qaida.

Pakistan and the Taliban sanctuaries it provides are a big part of the insurgents' success in Afghanistan, but it's only

one of many factors, Kugelman said.

"It's foolish to suggest that if the Pakistani sanctuaries were eliminated, the insurgency would magically go away and the US would be able to prevail in Afghanistan," he said. "The Taliban has persevered because the US still struggles to fight wars against non-state actors, and because the Afghan government has remained a weak and corrupt entity that has failed to convince a critical mass of Afghans that it's a better alternative to the Taliban."

Twitter

Afridi spends his days alone, isolated from a general prison population filled with militants who have vowed to kill him for his role in locating bin Laden, said Nadeem. Still, Nadeem said authorities are treating Afridi well and he is in good health, according to those who have seen him.

There was a no indication whether US Acting Assistant Secretary of State Alice Wells brought Afridi's case up in recent meetings in Pakistan. But in a statement, the US State Department told the AP that Afridi has not been forgotten.

"We believe Dr. Afridi has been unjustly imprisoned and have clearly communicated our position to Pakistan on Dr Afridi's case, both in public and in private," it said.

In the past, Pakistan has compared Afridi's dilemma with demands for the release of Afia Siddiqui, a Pakistani woman who is in US custody convicted of trying to kill an American soldier in Afghanistan.

"To America, she (Siddiqui) is a terrorist," said Kugelman. "To Pakistan, she is a wrongfully imprisoned innocent."
